- English

SUMMARY

I am a Network and Server Engineer with a solid educational background and practical experience in networking, server administration, virtualization, and cloud technologies. I am always eager to take on new challenges and learn from them.

EDUCATION

Higher Secondary Education
P. P. Savani High School
12th science (81%)
2019-2021

Dr. S & SS Gandhy engg. Government college, surat
Electronics & Communication Engg.
Dropped out (3rd Semester complete)

Iforward institute
Cyber Security (Running)
2022

GENERAL SKILL

- written & verbal communication and troubleshooting skills.
- Organizational, and time management skills.
- Strong analytical and problem-solving skills.
- Good interpersonal and communication skills.
- ·Strong troubleshooting and problem solving skills.

COURSES

- Comptia A+
- CCNA
- MCSE
- RHCE
- Cyber Security (Running)

TECHNICAL SKILL

Hardware and Network Engg.

- Hands on experience in complex and redundant designing of networking systems using Cisco Packet Tracer.
- Knowledge on TCP/IP stack, OSI, and protocol like ARP, ICMP, SNMP, DHCP, DNS, FTP, TFTP, SFTP, SSH, Telnet etc.
- Having knowledge and hands on experience of routing and routed protocols (RIP, EIGRP, OSPF), switching techniques like STP, RSTP, VTP, VLAN, inter-VLAN routing etc.
- Good knowledge and Hands on experience on configure various security protocols like port security, NAT, PAT, ACL, VPN, IPsec using Cisco Packet Tracer.
- Know how to troubleshoot end device (PC & Server), Routers and manageable switches regarding network connectivity.

System Administrator (RHCE & MCSE)

- Got hands on training on Linux and Window server administration.
- Know how to manage the User and groups and permission.
- Hands on experience on configuring Apache, FTP, DNS, DHCP, NFS, SSH, HA-proxy, Squid proxy in Linux operating system.
- Hands on experience on configuring Active Directory, IIS, FTP, DNS, DHCP, NFS, DFS shadow copy, group policy, High availability cluster and load balance in window server operating system.
- A solid understanding of a LINUX-based operating system; understands paging and swapping, inter-process communication, devices and what device drivers do, file system concepts, along with internal Linux hacking.
- Hands on training on configuration disk-management and RAID
- Having knowledge of DC, ADC, RODC, Child and Parent Domain how to join domain in Window Server
- Having basic knowledge of hands-on experience of configuring sites & services, Fail over cluster and FSMO.

TECHNICAL SKILL

VMWare Administrator

- Hands-on experience in Installing and upgrading VMware ESXi 6.5,6.7 & 7.0
- Experience in Install, Upgrade and Manage the vCenter 6.5,6.7 & 7.0
- Experience in Perform maintenance such as patches, drivers and firmware upgrades.
- Good hands-on for creating and managing Virtual machines and Hosts with vCenter server
- Planning and scheduling the server migrations in cooperation with onsite and clients.
- Installation & deploying ESXi hosts, vCenter Server, Creating Port Groups, datastores, VMKernel Switches & also managing the same
- VM migration with vMotion and SVMotion in VMware
- Server Conversion with P2V and V2V technologies.
- Cloning and template creation and deployment of VM's from template.
- VM migration with host and data stores & creating and managing snapshots.
- Well capable to troubleshoot HA, DRS and FT related issues in cluster environment.
